Medina**

My name is Joselin. I am a double major in psychology and media arts at Chico State. I would like to work in the entertainment industry in the production team. If not then I'd like to work with organizations within my community and or become a college advisor and help students who are first gen or are at risk get to college as I am someone from South Central LA.

I am joining LAYFTC because I want the community to be more aware of issues that harm us because unfortunately not many are aware and tobacco is one of those issues that impact us all in a negative way. I have a little sister who has asthma when we got to other cities she always mentions how her breathing gets 10 times better than when she is home. I have no knowledge of tobacco and it's history besides the negative effects and I hope to learn more about the program and about what specific action we can take to improve the community and prevent our community to continue the cycle of having easy accesible tobacco and bad health.
